

TASK 1: Basic Calculator Program

C Programming – Code

```
#include <stdio.h>

int main() {
    double a, b, result;
    int choice;

    printf("Enter two numbers: ");
    scanf("%lf %lf", &a, &b);

    printf("\n1. Addition");
    printf("\n2. Subtraction");
    printf("\n3. Multiplication");
    printf("\n4. Division");
    printf("\nEnter your choice: ");
    scanf("%d", &choice);

    switch (choice) {
        case 1:
            result = a + b;
            printf("Result = %.2lf\n", result);
            break;

        case 2:
            result = a - b;
            printf("Result = %.2lf\n", result);
            break;

        case 3:
            result = a * b;
            printf("Result = %.2lf\n", result);
            break;

        case 4:
            if (b == 0)
                printf("Error: Division by zero is not allowed.\n");
            else {
                result = a / b;
                printf("Result = %.2lf\n", result);
            }
            break;

        default:
            printf("Invalid choice.\n");
    }

    return 0;
}
```
